

In the Specification

Please amend paragraph [19] on page 3 of the present specification as follows.

[19] An exemplary embodiment of a pressure relief valve 10 is illustrated in FIGURE 1. In the exemplary embodiment of FIGURE 1, the valve 10 includes a housing 12 that may comprises a base 14 and a housing cover 16. The exemplary valve 10 also includes a valve member 18 that is positioned with the housing cover 16 and operates to selectively engage a seal surface 20 on the base 14 in a sealing relationship. The exemplary pressure relief valve 10 may be attached to a pressure vessel or other potential source of pressurized fluid to relieve fluid pressure from the pressure vessel in overpressure conditions.
